Annales du LAMSADE N°3

Collection Cahiers et Documents	I
Foreword	II
J. Abello <i>The Majority Rule and Combinatorial Geometry (via the Symmetric Group)</i>	1
E. Beigman <i>Characterizing Neutral Aggregation on Restricted Domains</i>	15
R. Bisdorff <i>Preference aggregation with multiple criteria of ordinal significance</i>	25
D. Bouyssou, M. Pirlot <i>On some ordinal models for decision making under uncertainty</i>	45
Y. Chevaleyre, U. Endriss, S. Estivie, N. Maudet <i>Multiagent Resource Allocation with K-additive Utility Functions</i>	83
J. -P. Doignon, J.-C. Falmagne <i>What can we learn from the transitivity parts of a relation ?</i>	101
B. Escoffier, V. Th. Paschos <i>Differential approximation of MIN SAT, MAX SAT and related problems</i>	115
O. Gauwin, S. Konieczny, P. Marquis <i>Conciliation and Consensus in Iterated Belief Merging</i>	137
C. Gonzales, P. Perny <i>Graphical Models for Utility Elicitation under Risk</i>	157
O. Hudry <i>Computation of median orders: complexity results</i>	179
M. F. Janowitz <i>Continuous Ordinal Clustering: A Mystery Story</i>	215
J. Lang <i>Compact preference representation and combinatorial vote</i>	223
B. Leclerc <i>On the consensus of closure systems</i>	237

J.-L. Marichal, R. Mesiar, T. Růckschlossová <i>A Complete Description of Comparison Meaningful Functions</i>	249
F. R. McMorris, R. C. Powers <i>May's Theorem for Trees</i>	259
S. W. Pickl <i>An algorithmic solution for an optimal decision making process within emis- sion trading markets</i>	267
A. Tsoukiàs, Ph. Vincke <i>Preferences On intervals: a general framework</i>	279
